Career Profile

Full Stack .NET Developer with hands-on experience delivering RESTful APIs and full-stack web applications using ASP.NET Core, Entity Framework Core, and SQL Server. Delivered 2 freelance backend systems for real clients – a secure HR management platform and an e-commerce API with integrated payments – and built 3 additional portfolio-grade systems applying Clean Architecture, CQRS, and role-based security. Comfortable across the stack with Angular, Bootstrap, and Tailwind CSS on the front end, and experienced using AI-assisted development tools to speed up implementation and debugging. Looking to bring this API-development, database-design, and problem-solving background to the Full Stack .NET Developer role at Click Enterprise.

Education

Bachelor of Computer Science 10/2023 – 08/2027
El Shorouk Academy, Shorouk City, Egypt

Experience

Freelance Full-Stack .NET Developer – ARAM Candles (E-Commerce Platform) 08/2026 (2 weeks)
Freelance / Remote

- Designed and developed a RESTful e-commerce API using ASP.NET Core, Entity Framework Core, and SQL Server, covering product catalog, shopping cart, and order management.
- Implemented JWT-based authentication and role-based authorization for customer and admin access levels.
- Built order tracking, product review, and automated email confirmation features to support the post-purchase customer journey.
- Integrated the Paymob payment gateway to process online transactions.
- Developed an admin dashboard for managing products, orders, and inventory.

Freelance Backend .NET Developer – HR Management System API 12/2025 (1 month)
Freelance / Remote

- Developed a RESTful HR Management API with ASP.NET Core and Entity Framework Core, covering employee and role management.
- Implemented secure role-based access control and Google OAuth authentication.
- Configured automated email notifications for HR workflow events.
- Migrated the database from SQL Server to PostgreSQL and deployed the API on Render and Railway.

Projects

CompanyHub – Multi-Tenant B2B SaaS Platform
ASP.NET Core, Clean Architecture, SignalR, Redis, Hangfire, Paymob

- Built a multi-tenant SaaS backend using Clean Architecture, applying tenant isolation through global query filters and a Current-Tenant service.
- Implemented real-time features with SignalR, background job processing with Hangfire, and caching with Redis.
- Added two-factor authentication (TOTP), API key management, and Paymob webhook-based billing integration.

AI Travel Trip Planner
ASP.NET Core, Clean Architecture, MediatR/CQRS, Groq API

- Building an AI-powered itinerary generator using Clean Architecture and the CQRS pattern with MediatR.
- Integrating the Groq API for AI-generated itineraries, OpenStreetMap and OpenWeatherMap for location and weather data, and Paymob for payments.

SocialMedia API

ASP.NET Core, JWT, SignalR

- Built a scalable social media API with JWT authentication and role-based access.
- Implemented posts, comments, likes, and real-time notifications, plus report/block systems and auto-expiring stories.

Courses & Certifications

Back-End .NET Track – ITI (Information Technology Institute)

ASP.NET Core backend development track covering C#, EF Core, and RESTful API design.

Back-End Development Workshop – DSC Cairo University

Workshop covering backend development fundamentals and practices.

Front-End Development Workshop – DSC SHA

Workshop covering front-end web development fundamentals.

Skills

Programming Languages: C#, JavaScript, TypeScript

Core Concepts: OOP, Clean Architecture, Design Patterns, Data Structures

Backend Development: ASP.NET Core, ASP.NET MVC, RESTful APIs, Entity Framework Core, JWT Authentication

Database: SQL Server, LINQ, PostgreSQL (Supabase)

Frontend Development: HTML, CSS, Bootstrap, Tailwind CSS, Angular, Blazor (familiarity)

Payments & Integrations: Paymob Payment Gateway

DevOps & Deployment: Git, GitHub, Railway, Render, Cloudflare, Monsterasp.net

AI-Assisted Development: Claude (Claude Code) for development and debugging support

Tools: Visual Studio, Postman, SQL Server Management Studio

Soft Skills: Client Requirements Consultation, Analytical Thinking, Problem-Solving, Attention to Detail

Languages

Arabic – Mother Tongue | English – Good
